

Citrix Workspace

Driving a powerful user and IT experience across a comprehensive set of workspace services delivered entirely from Citrix Cloud.

Citrix Workspace empowers IT to deliver secure access to apps, data and services on any device, through a single pane of glass for comprehensive management, visibility and intelligence, including actionable end-to-end analytics.

Citrix Workspace empowers the end-user with a familiar experience across all device types with the new Citrix Workspace app. The Citrix Workspace app allows users to access their comprehensive digital workspace from any device. Workspace app provides a single point of entry to the entire user workspace, including managed mobile apps, web, SaaS, Windows and Linux app/desktops and distributed file stores.

Delivering and managing a complete workspace requires support for all layers of the Workspace Technology Stack. Only Citrix has the unique ability to deliver at every layer of the Workspace Technology Stack with industry leading products such as Citrix Endpoint Management, Content Collaboration, Citrix Access Security, Citrix Apps and Desktops and Citrix Analytics for end-to-end visibility and control.

With complete support for all layers of the Workspace Technology Stack, Citrix is able to easily build integrations between those layers providing customers with unique value not available anywhere else. This results in an unmatched experience for both the user and IT.

Feature Description	Citrix Workspace Standard	Citrix Workspace Premium	Citrix Workspace Premium Plus
End User Experience			
Unified app store offers automated provisioning of all application types and device form factors	✓	✓	✓
Citrix Workspace app for authentication, SSO, integrated apps and data, access security, app launch intelligence	✓	✓	✓
Unified Admin Experience			
Single pane of glass for management and control of all Workspace services	✓	✓	✓

Unified Endpoint Management		
Device and OS management including iOS, Android, Win 10, macOS, Chrome, Citrix Ready workspace hub & IoT	✓	✓
Application Management including MDX, Android, Intune App Protection, KNOX, App Config and more	✓	✓
Business class productivity apps including email and browser	✓	✓
BYOD solution including MDM independent MAM with no device agent requirements	✓	✓
Workspace Environment Management (WEM) extends UEM capabilities to Windows 7 and 8.1 device types	✓	✓
Micro-VPN for complete application data encryption and Isolation	✓	✓
Microsoft EMS/Intune integration for simplified Office 365 management	✓	✓

Citrix Access Control			
Cloud App Control to protect IP and increase control over user actions while accessing SaaS applications	✓	✓	✓
Single Sign-on to all SaaS, enterprise hosted web and Citrix virtual applications	✓	✓	✓
Web filtering of whitelist and blacklisted Internet URLs for compliance and protection from malicious content	✓	✓	✓

Content Collaboration		
Securely share and collaborate on sensitive and large files using secure links, or initiate a structured workflow to automate the sequences of routine tasks	✓	✓
Connectors provide unified access to network storage, legacy data systems and third-party cloud storage without requiring a data migration	✓	✓
Encryption of files and email content at both rest and in transit using 256-bit encryption	✓	✓
Information Rights Management (IRM) ensures content cannot be downloaded or is downloadable as a watermarked PDF only, protecting against the risk of unwanted screen captures	✓	✓
Structured workflows streamline and automate the collection and sharing of feedback, approvals, signatures and more	✓	✓
Storage flexibility meets the unique combination of storage options, including cloud, on-premises, and hybrid infrastructures	✓	✓
Drive Mapper optimizes ShareFile for use in virtual environments like Citrix Apps and Desktops	✓	✓

Virtualized Apps and Desktops	
Industry leading virtual app and desktop solution for Windows and Linux	✓
Open architecture supporting any public cloud or any hypervisor deployment scenarios	✓
Centralized image management for streamlined operations and IT productivity	✓
App Layering technology simplifies application updates across any hypervisor or cloud with 99.5% application compatibility	✓
Largest library of supported peripherals including printers, audio recorders, web cams, signature pads, and more	✓
Advanced monitoring & analytics including proactive notification, alerts and application probing to ensure site health	✓
Common Criteria and FIPS compliance security validations	✓
Unified communications optimization delivers bandwidth-efficient, crystal-clear voice, multimedia and video	✓
High definition user experience from any device, over any network keeps users productive from anywhere	✓

Analytics			
User behavior security analytics with per user risk detection scoring, assessment and mitigation	✓	✓	✓
App performance analytics and root cause analysis (coming soon)	✓	✓	✓
Operations usage analytics for tracking app usage, network resource utilization and capacity planning (coming soon)	✓	✓	✓
Advanced analytics for Access Control contributing risk indicators for risky web site access, blacklisted URLs, unusual upload/download volume	✓	✓	✓
Data security analytics to detect and prevent excessive access to sensitive files, excessive file sharing and downloads, and suspected ransomware attacks		✓	✓
Unified Endpoint Management analytics to detect unmanaged or jailbroken devices and devices with blacklisted apps		✓	✓
Virtual apps and desktop analytics for tracking unusual app usage, access from devices with an unsupported O/S, and potential data exfiltration			✓
